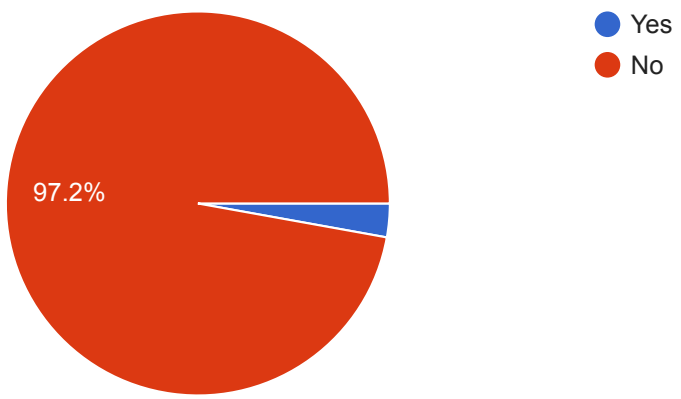
## Have you attended a BRAINWAVE workshop before?

Copy

106 responses



## What are you most hoping to gain from this workshop?

93 responses

Learn about the brain and gain some advice for my parents

Knowledge

Learn about new resources to support my students

info

Strategies to better understand my students.

Undestanding of role of sleep in brain health

I don't know exactly what is this workshop about yet.

more knowledge to support students.

New knowledge

learning how sleep patterns affect learning

More information to help my students

I would like to learn how the role of sleep affects students and people in general.

Supports

Grow in my understanding of how sleep affects learning and behavior and development.

Content to take back to the classroom.

I would like to attain more information.

To be able to apply what I learn in my practice as a teacher.

A way to connect this understanding to my teaching practice

Any knowledge that can help me and my students achieve better results is welcome.

Hands on experience and research updates.

I have questions!

Learn more about the brain

I hope to gain a deeper understanding of the neuroscience connected to the sleeping and learning brain.

New knowledge I can implement in my classroom

Knowledge and deep understanding of the developing neurodivergent brain and correlation to learning and behavior of young learners. And resources on neuroscience knowledge, fostering a stimulating and curious classroom environment.

Sleep and it's effect on behavior in students with ESN

I am excited to learn new forms to be a better educator for my student population.

Strategies or techniques to help my students behaviors.

I hope I can learn to teach my autistic students who sometimes they have bad sleeping problems and are very hyperactive during school hours.

Learning more about behavior management.

I am hoping to learn more about how students sleep patterns affect their learning and behaviors.

How to better assist my students who have attention difficulties.

Best practices for detecting and supporting students that are affected

MORE KNOWLEDGE ON BRAINS IN REST MODE.

Hopefully to gain more knowledge that I can use in my classroom

To learn more about the correlation between sleep and behavior

TO LEARN ABOUT SLEEP PATTERNS

How to better support students and families with managing/balancing screen time with getting enough sleep for stronger physical, mental, social, spiritual health

Insight

Sleep and how it impacts behavior

Understanding/new approaches

Learn new skills

Useful information to inform and guide my instruction.

Learn more about the topic.

Practice tips

I hope to gain valuable information on how to address students who are not getting enough sleep and promote healthy sleeping habits for students and myself.

Knowledge and Resources

gain new information in regards to the relationship between the brain and learning

Knowledge on how sleep affects learning and behavior,

Resources for the families of my students to help them with bedtime and getting a good night's sleep.

Unidertanding student behavior and new strategies to help my students

new ways to teach. behavior management

Understand how the brain works and how to support my students

I want to strengthen my practices with different and new strategies to make sure that I am always in the headspace to conduct a classroom. Mental wellness strategies would be delightful.

Understand the role of sleep and strategies to ensure it's put into practice.

tools to use to be more effective in my classroom

I am hoping to learn more about the connections between sleep and information retention.

Greater insight on how improve my teaching skills

How this impacts my students and strategies.

Learn how to increase student attention span

To gain more insight on how the brain works, as a special educator there are many challenges that individuals with a disability or two struggle with daily and to be an advocate for students is a challenge. Gen Ed. teachers often don't get it and it is difficult to educate my colleagues to try to have compassion, empathy and to see it from the student's perspective. Often Gen. Ed teachers don't see the UDL, PBIS and other strategies to benefit the brain of many of my students who have a disability.

I would like to better understanding how sleep impacts learning, memory, and processing for students.

learn something new to help my students.

Honestly, based on what I read on the flyer, the subject is very interesting! I would love to learn how sleep plays a vital role in education.

lEARNING SOMTHING NEW.

I hope to learn how sleep affects my students' learning, behavior, and development. Many of my students struggle with focus and emotional regulation, and I want to understand how rest impacts these areas. I'm also hoping to gain practical strategies to support students who may come to school tired or dysregulated so I can better promote their academic success and overall well-being.

Deeper Understanding of how sleep affect the brain. Insight into the link between sleep and learning.

More insight on subject

Understand brain patterns and strategies to keep students awake

I am hoping to gain knowledge in how rest or lack of rest could impact my students health and social emotional needs

The most recent brain research and support for my diverse students, as well as behavior neuroscience.

Ways to implement in classroom

Methods that can be used on an adaptive curriculum for special education students.

Information to better serve students and understand the role that adequate rest plays in skill development and attention.

knowledge about the brain and sleep

Learn how to integrate new strategies for my classroom

Brain/Sleep/Learning correlation

Deepen my understanding on how sleep impacts learning.

Insight on how sleep impacts learning

More information on how I can help students, families regarding Neuroscience of Sleep and Its Role in Learning, Behavior, and Development.

To learn how the brain learns

To learn about how sleep impact students learning

I would like to learn more on the effects that sleeping or lack there of have on our brain and students' performance.

any tips that may help me to help students & families

More strategies to support students with extensive support needs.

The neuroscience of sleep and its role in learning.

What is BRAINWAVE and how it supports or impacts our students.

More information on the role sleep plays in learning

I’m hoping to gain new strategies to enhance student engagement and creativity.

More knowledge about sleep and attention

To gain a better iunderstanding to help my students function

Learn strategies to share with my students.

Insight on the neuroscience of sleep

**Are there specific challenges related to sleep, attention, or student wellness that you've observed in your classroom?**

107 responses

Yes

yes

Attention

The young kids don’t get enough sleep, their parents tell me their bed times

In the past

No

not enough sleep

Students suffering from fatigue because of irregular sleep patterns

Yes, I have several students who's struggling attention to learn.

A lot of my students struggle with staying on task and paying attention.

attention, aggression

Student wellness and sleep

yes, some students have unusual sleep patterns per parent

YES

Students are not sleeping enough affecting their learning?

Yes, there are a few students in my classroom (one in particular) that if left alone for 2-4 minutes, he will fall asleep all day.

Lots of sleeping, short attention span

Yes, with many English Learners having to work after school, they return to school the next day sleep deprived and have a difficult time functioning adequately.

Yes, I have observed many of my students seem to be focused after the class ompletes a five to ten minute stretch video from online.

Yes, I have a chronic sleeper.

Students are very angry

I have many students who appear tired, and many have inattention. I am a special education teacher, and my students with exceptional needs experience many of these challenges.

attention

I have sleepy students all the time. I also wonder about how students on the spectrum are impacted by sleep irregularities.

I have observed challenges with students being exhausted from a lack of sleep and the impact that has on their attention and overall wellness.

Amount of sleep students get

Yes, specifically with neurodivergent students.

Lack of sleep equals to lack of focus and no work is being produced

Lack of focus, hunger, irritability, trouble regulating emotions

Yes, most of my students are Autistic and I would like to know more about how autism effects sleep.

Students sleeping and their attention span is limited.

Yes, it is very hard for most of my students to stay focus throughout the lessons. They are very use to videos with songs.

Aggression towards others, lack of sleep

I have observed my students struggling with their behaviors and ability to make academic progress due to their sleep, attention, and wellness.

Low stamina for learning, irritability, and difficulty with sustained attention,

How can I support my students when they are falling asleep and not paying attention in class?

YES. THEY NEED TO BE SLEEPING MORE.

I would say sleeping. We have a student who falls asleep during class and student with short attention spans. Especially since I'm in Special Ed

Yes, I've had students who have slept through class almost every day.

STUDENTS ARE GOING TO BED LATE DUE TO BEING ON THEIR DEVICES/PHONES/TIK-TOK

*stamina/growth mindset/belief in self for ability to "do hard things"
*struggling with sustained attention/focus/executive functioning
*struggle with regaining focus/understanding after an interruption
*falling asleep in class
*need for immediacy (preferred activity, attention/validation/support)
*self-regulation (emotions, physical movement, frustrations)

Attention due to disability

Sleep and attention from my students. Lack of sleep attention and temperament increases

I am a new teacher - first student comes Monday

I instruct students that are sleep deprived, have ADD/ADHD, learning disabilities and that have suffered from trauma in the household.

I have noticed that students have difficulty focusing often.

Mostly attention

Students falling asleep during a lesson and or having their heads down and not wanting to pay attention/listen to teacher.

ADHD

i have many students walking in sleepy every morning and have low attention spans

I have students who have behaviors that are due to disability but also she wakes up at 5am so I believe lack of sleep has a major impact on the causes as well.

Yes, most of my students have challenges with sleep and attention in class

Yes. I work with students with disabilities and many of them have trouble sleeping at night.

Yes, many students come in too sleepy to focus in class.

SPED related

all and memory (short and long) aggressive, etc

Students attention and wellness are of concern. I have seen students that are tired and don't pay attention in class because they are not getting appropriate amounts of sleep.

Kids fall fast asleeep, they are not focused, they have bags under their eyes, and they are barely waking up after recess.

Yes to all. I've observed challenges related to sleep, attention and overall wellness.

some students struggle with all three

Students do not receive enough sleep before entering the classroom at 8:00 AM.

Yes, all the above

students sttention to academic work and ability to follow directions are determined by their previous nights slieep.

Lack of focus and ability to self-regulate.

Yes, students stay up late playing video games at night leading to difficulties at school.

Yes. Not in my classroom but in the Gen. Ed classroom and so as the Sped teacher, PBIS support and the Lead Inclusive Practices teacher it is difficult to change the mindsets of teachers who don't want to understand how neurodivergent thinkers actually process and learn. Gen. Ed teachers struggle to see differentiated teaching or UDL teaching as a practice. Behavior IS Communication! Sleep, attention and the student's wellness are part of the WHOLE Child and it is vital to understand that if the Basic need is Not being met the student will have challenges, period point blank! Our job is to figure it out and to best try to meet the need...sometimes it is difficult, but we must work together as a team.

Keeping their attention first thing in the morning in a class that has a lot of heavy content

I have students that appear to be fatigued and struggle to focus. They also struggle to stay on task, act out, or demonstrate behaviors that alienate that from their peers. Their mood also seems impacted.

Students coming to class and immediately put their haed down and going to sleep instead of participating in class.

Yes, students who do not get enough rest often regress in their reading.

Most definitely. Now more the ever. With technology being the #1 reason for my kiddos having trouble sleeping.

yes student come to class very tired.

I’ve noticed that several students struggle with staying alert and focused during morning lessons, often appearing tired or disengaged. Some students have difficulty regulating their emotions or behavior, which may be linked to inconsistent sleep routines. I’ve also observed

that students who report poor sleep tend to have more trouble with memory and completing tasks. These challenges affect both their learning and social interactions, so I'm hoping to learn strategies to better support their overall wellness and attention in class.

Yes, inconsistent sleep routines, attention challenges.

Attention of Autistic students

No, but I want to be prepared.

During our weekly mood check-in, there is an overwhelming response that students are tired or lacked sleep the night before. I then notice these students are unfocused or unmotivated in class.

Students staying up late on social media, and students with difficulty sleeping due to their neurodivergence and genetic disorders.

Sleep and cooling down after lunch.

I have observed sleeping during independent work time and during warm-up 3 minute videos.

students don't sleep and this affect attention / wellness and learning

Sleep

I have a student that sleeps throughout the class, plays sports, and helps out his paraplegic father and helps with 2 toddler younger siblings, Mother is not present. Extremely smart kiddo.

Many of my students stay up at night on their devices and have a hard time engaging in lessons.

Some students seem to have a hard time focusing even during short tasks. Teachers have also expressed that some students sleep for a large portion of the school day.

I teach students with autism who have often have highly fluctuating sleep patterns.

Have many students fall asleep in class, struggle to pay attention stating they have difficulty sleeping at night

Children do not focus

Alot of my students cant focus because they're not sleeping well. They stay up late!

Short attention spans, lack of energy and engagement

Many of our students with disabilities stuggle with sleep and attention

Attention

Sleep.

Moodiness, lack of attention, disruptive behaviors

Yes, students have short attention spans, have difficulty expressing themselves and managing their emotions and showing compassion and empathy towards one another.

Student behaviors; parents reporting that students often have a hard time sleeping

Yes... several sleepy heads here!

I see a growing need for students to learn self-regulation and mindfulness strategies.

Students are more alert after nutrition.

yes a lot.

2 more responses are hidden

**What topics or questions would you like to see addressed in the workshop?**

81 responses

NA

Strategies

Not sure

how to get families to prioritize sleep

how I can address or help my students and communicate with parents

role of sleep in brain health and overall wellness

Strategies to help those above students

behavior support

It's role in behavior and learning

when are optimal times for student engagement during the day

SUPPORTING STUDENTS WHO HAVE SLEEP APNEA

sleeping patterns

What strategies can we use at school and at home to help students who do have sleeping problems.

Lengthening attention span

How does sleep contribute to good health?

I am hoping that students with special education is a topic in the workshop

I would like to learn more about what is the neuroscience of sleep and how I can support my student's wellness.

How can we support students and parents to maximize outcomes and well-being?

How to get students to focus during whole group instruction?

ADHD and sleep
Autism and Sleep
Middle-Age and sleep

I'm excited about the learning opportunity.

behavior and attention and how to address those in relation to student's sleep pattern

I am not sure

All the above

How does autism effect sleep.

Everything related to teaching students in special education.

How to help students manage and regulate their behavior

I would like see how device use affects their sleep patterns and how their sleep cycles affect their behaviors and abilities to learn.

Factors that are in the teachers control and how to cope with those out of our control

Supports/accommodations for students with disabilities

HOW TO DISCIPLINE THEIR CHILD SO THEY WANT TO GO TO SLEEP ON TIME.

Not sure at this time

HOW TO ADDRESS DIGITAL CITIZENSHIP/PHONE USE AT NIGHT WITH PARENTS.

see above with student and family support

Any

motivations and emotional social support

I want to learn

I am interested and open to any information that I can factor into my instruction.

Any regarding attention span

How do we promote healthy sleeping habits for our students or keep them engage when they have had little sleep.

Don’t know much about the topic

Student wellness

Helping student with autism and ADHD get a restful sleep.

SPED helpful

learning difficulties and attention

HOw best to address students who are tired in the classrooms. What are strategies that a teacher can use that gets students back in the learning frame of mind.

how I can help the students with these 3 challenges so they can excel

Should older elementary students be given time during the school day to nap?

attention and motivation

can naps in the class help students in the classroom

What are some assessable and easy strategies that can help students with more significant disabilities?

The brain on electronic devices and the circadian rhythm

Best practices on how to collaborate with staff. PDs and other trainings suggested to support educators.

How to encourage students to sleep and teach benefits to the students

Interventions that can be used to help students with sleep and wellness struggles to better assist with their learning and ability to access the curriculum.

How it affects middle school students.

Interested in all

How to improve participation from students

I would like the workshop to address how lack of sleep affects attention, memory, and behavior, especially for students with learning differences or ADHD. I'm also interested in learning strategies teachers can use to support students who struggle with sleep, such as classroom routines, mindfulness practices, or family communication tips. Additionally, I'd like to understand how sleep impacts emotional regulation and how to create a classroom environment that promotes focus and wellness.

How does sleep impact memory consolidation and learning in young children.

How to gain attention from autistic students

Current research and strategies

I am curious about: building memory, learning with a TBI, and executive functioning,. and how to create ease around learning

How can we engage brains that may not experience adequate sleep routines?

all of the above and more

Behavior and how it relates to sleep

Lack of sleep and how it affects learning.

lack of sleep and the Nero-divergent brain

Is there any research that specifically addresses the impact of sleep on individuals with severe cognitive disabilities? What resources can we share with parents/families to support with night routines for students with disabilities?

possible solutions

If I complete the workshop, will I receive a salary point?

Sleep workshops for parents and students

I am open

Attention, sleep, and student wellness.

All information available.

Not sure yet..

I'd like to learn strategies to help students improve focus and attention in class.

Sleep

Strategies to use with my students to get them to focus during our lessons.

**Do you have any accessibility needs or accommodations that would help you fully participate in this workshop?**
